

**New twists on old hypotheses –
a “multiomic” informed view of AD and
other neurodegenerative proteinopathies**

Todd E. Golde, MD, PhD

Director, Evelyn F. and William L. McKnight Brain Institute
Director, 1Florida Alzheimer's Disease Research Center
Member, Center for Translational Research in Neurodegenerative Disease
Professor, Depts of Neuroscience and Neurology, College of Medicine
University of Florida

Upcoming Presentations

Jan 19: Clinico-Pathologic Correlation Conference (CPC) (UCSD)

The Neurodegenerative Series is hosted by the UC San Diego Shiley-Marcos ADRC Outreach, Recruitment and Engagement Core. Sessions are generally held on the first and third Tuesdays of the month from 9am-10am beginning in September and running through May. Prominent faculty speakers from institutions across the country and abroad present on a wide array of topics related to neurodegenerative disease, primarily Alzheimer's disease. The target audience is the academic community that includes resident and visiting faculty, postdoctoral fellows, and graduate students. Attendees are primarily from the UCSD Department of Neurosciences, but there is significant representation from other UCSD departments as well as affiliated institutes and universities.
