

CONTRIBUTE TO ALZHEIMER'S RESEARCH

Are you a woman 65 years or older?

Take part in research that could help develop specialized therapies for both men and women at risk for Alzheimer's.

Join our study on brain inflammation to help future generations.

ABOUT WITS

The Women Inflammation and Tau Study (WITS) uses imaging, blood testing, and wearable technology to investigate potential biological and lifestyle factors that may contribute to greater brain changes in women versus men at-risk for Alzheimer's disease.

Participation in the study includes:

- PET and MRI imaging.
- Remote neurocognitive testing
- blood and CSF collection
- questionnaires and wearable devices

*We are taking several precautions
in relation to COVID-19,
please ask for details*

Interested in Participating in WITS?

We are here to answer your questions via
phone or email.
